

HE Series Selectable Candela Evacuation Signals

HEC/HES/HEH

APPLICATIONS

The HE Series is a low profile strobe and horn/strobe combination that offers dependable audible and visual alarms and the lowest current available.

The HE Series 24VDC offers tamperproof field selectable candela options of 15, 30, 60, 75, and 110 candela.

The 12VDC models offers tamperproof field selectable candela options of 15, 30, 60, and 75 candela. The HE Series horn offers a continuous or synchable temporal three in 2400Hz and mechanical tone, a chime and whoop tone. All tones are easy for the professional to change in the field by using switches.

The HE Series has a minimal operation current and has a minimum flash rate of 1Hz regardless of input voltage.

The HE Series is shipped with the standard 4" metal mounting plate which incorporates the popular Slide feature that allows the installer to easily test for supervision. The product also features a locking mechanism which secures the product to the bracket without any screws showing.

The HE Series appliances are UL 464 and UL 1971 listed for use with fire protective systems and are warranted for three years from date of purchase.

STANDARD FEATURES

- Nominal voltage 12VDC and 24VDC
- 24VDC units have field selectable candela options of 15, 30, 60, 75, and 110 candela
- 12VDC units have field selectable candela options of 15, 30, 60, and 75 candela
- Unit Dimensions: 5" high x 4.5" wide x 2.5" deep
- Synchronize strobe and/or horn with Hochiki Series Control Module (12VDC product must use the HAVSM Module)
- Prewire entire system, then install signals
- Lower installation and operating costs
- Input terminals supports 12 to 18 gauge wire
- Switch selection for high or low dBA
- Switch for chime, whoop, mechanical and 2400Hz tone
- Switch for continuous or temporal 3 (not available on whoop tone)
- Surface mount with the HSB (Hochiki surface mount box)
- Silence horn while strobes remain flashing
- Wide voltage range 8-17.5VDC (12VDC units) 16-33VDC or FWR (24VDC units)
- Faceplate available in red or off-white

- UL 464 & UL 1971 Listed - S8369
- CSFM Listed - 7135-0410:0187, 7135-0410:0188

Product Compliance

- NFPA 72
- Americans with Disabilities Act (ADA)

NOTES:

- Operating temperature: 32° to 120°F (0° to 49° C). The HE Series is not listed for outdoor use.
- The sound output for the temporal 3 tone is rated lower since the time the horn is off is averaged into the sound output rating. While the horn is producing a tone in the temporal 3 mode its sound pressure is the same as the continuous mode.
- For nominal and peak current across UL regulated voltage range for filtered DC power and unfiltered (FWR [Full Wave Rectified]) power, see installation manual. 12VDC models are DC only.
- Hochiki does not recommend using a coded or pulsing signaling circuit with any of our strobe products (see Technical Bulletin 014).

*Operating the horn in this mode at this voltage will result in not meeting the minimum UL reverberant sound level required for public mode fire protection service. These settings are acceptable only for private mode fire alarm use.

Use the high dBA setting for public mode application (not applicable when using the chime tone. The chime tone is always private mode).

¹ RMS current ratings are per UL average RMS method. UL max current rating is the maximum RMS current within the listed voltage range (16-33VDC for 24VDC units) (8-17VDC for 12VDC units). For strobes the UL max current is usually at the minimum listed voltage (16VDC for 24VDC units) (8VDC for 12VDC units). For audibles the max current is usually at the maximum listed voltage. For unfiltered FWR ratings, see installation manual.
